# Agricultural and Horticultural Census

## June 2001

### Why this is important

Your return helps provide key information for organisations representing farmers and growers and policy makers at local, national and EU level. It is vital that everyone who makes policy or seeks to influence the policy making process has access to the accurate and up-to date information the census can provide. This helps everyone make well informed decisions and representations and evaluate the success or otherwise of previous initiatives. It also provides hard evidence on the condition of your industries and pointers as to how they may develop in the future.

We recognise that it may require some time and effort to get the necessary information together. We are doing all we can to minimise the form filling burden on you. For instance, we are gathering information from other parts of MAFF and using new methods of analysing statistics that should result in the need to contact fewer farmers and growers and do so less frequently.

**The Census is so important that there is a legal obligation under the Agricultural Statistics Act, 1979, on you to complete and return this form. High response rates and accurate returns will help us to continue work in reducing the size and frequency of such inquiries**

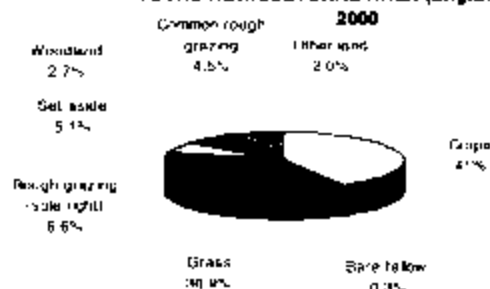

**At the end of this form you are asked to indicate the length of time taken to complete it. We use this to work out how successful we are in minimising the amount of paperwork we ask you to do.**
