Agricultural and Horticultural Census

June 2001

Why this is important

Your return helps provide key information for organisations representing farmers and growers and policy makers at local, national and EU level. It is vital that everyone who makes policy or seeks to influence the policy making process has access to the accurate and up-to date information the census can provide. This helps everyone make well informed decisions and representations and evaluate the success or otherwise of previous initiatives. It also provides hard evidence on the condition of your industries and pointers as to how they may develop in the future.

Thank you for your co-operation.
